

University of Development Alternative

LETTER OF RECOMMENDATION

Dear Concern,

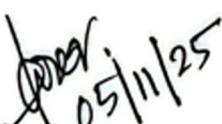

It is my pleasure to recommend Mst Karniz Fatima, who was my student during her Bachelor of Science in Computer Science and Engineering at the University of Development Alternative (UODA). I had the opportunity to teach her in several core courses, including Artificial Intelligence, Neural Networks, and Digital Image Processing, where she consistently demonstrated exceptional competence and dedication.

Karniz stood out for her strong programming skills, analytical thinking, and ability to apply theoretical concepts to practical problem-solving. She maintained outstanding academic performance throughout her degree, securing 3.71 out of 4.00 in her bachelor degree in Computer Science and Engineering and also received the Vice Chancellor's Award for outstanding performance. Her disciplined approach to learning, combined with curiosity and motivation to explore beyond the classroom, reflects her potential as a highly capable and promising student.

In addition to her academic strengths, she possesses remarkable leadership and interpersonal skills. She effectively led group projects, collaborated well with peers, and maintained a positive and respectful attitude toward both classmates and faculty. Her ability to guide and support others, along with her technical expertise, makes her a well-rounded individual ready to thrive in challenging academic environments.

I am confident that Karniz's strong academic foundation, technical abilities, analytical mindset, and leadership qualities will allow her to excel in any international program. I wholeheartedly recommend her for admission and scholarship consideration.

Sincerely,

Md. Tareq Hasan
Assistant Professor
